#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moran et al. (Moran) in view of Codilian et al. (Codilian) and Baker et al. (Baker).

Moran teaches at col 3, lines 1-35, transferring a servo reference pattern to a self-servo writing disk drive and using the servo information from the reference pattern to self-write servo patterns onto a disk in concentric track patterns. Moran does not teach self-writing servo patterns on a spiral trajectory nor does Moran teach that the concentric and spiral servo patterns have finer resolution than the reference patterns.

Codilian teaches at col 5, lines 36-45, recording a plurality of servo burst pairs on concentric circles and in a spiral form. Baker teaches at col 17, lines 16-33, writing of servo burst at various pitches. At the time of the invention it would have been obvious to modify the teaching of Moran with the suggestion of Codilian of writing spiral bursts for the reasons that are indicated on his Abstract and further to modify Moran with the suggestion of Baker for the reasons he indicates at col 3, lines 7-11.

Regarding claim 10, the claim are drawn to the method of using the corresponding apparatus claimed in claim 1. Therefore method claim 10 corresponds to apparatus claim 1, and is rejected for the same reasons of obviousness as used above.

### Allowable Subject Matter

3. Claims 2-9 and 11-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 19-20 are allowed as the prior art does not teach or suggest the applicant's invention. Claim 19 teaches a disk drive. The distinguishing element of the claim is a second set of product servo bursts written to the disk at an oblique angle relative to the first set of product servo bursts.

## Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mitchell R Slavitt whose telephone number is (703) 305-2809. The examiner can normally be reached on M-F (6:30-4:00), 2nd Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David R Hudspeth can be reached on (703) 308-4825. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
